and the Museum of Flight
proudly present:**

The Time Gremlins

In the old aviation comic books, Gremlins were the small gnome-like creatures that suddenly appeared with their hammers and saws and drills to demolish aircraft in flight. At least the pilots could see those gremlins. But there are others that cannot be seen and they are just as effective at destroying airplanes and pilots. Time is a threat that insidiously weaves its way among the causes of aircraft accidents.

Spence Campbell has made a lengthy study of how time has factored into hundreds of aircraft accidents and how pilots can become more aware of the pitfalls created by time pressures. Most aircraft accidents could have been prevented if the pilots and the maintenance personnel of those aircraft had not fallen victims to the Time Gremlins.

There is no charge for the seminars and reservations are **NOT** required. Of course, it qualifies for the seminar portion of the FAA Pilot Proficiency Awards Program (WINGS). Should you wish to arrive early and tour the fascinating displays at the Museum of Flight on Thursday evening (a very worthwhile experience), normal admission rates will apply. Fly-In parking is available at the Museum of Flight. Fly-In pilots please review Hand Signals in paragraph 4-3-25 of the Aeronautical Information Manual.

See you there!

Wed. June 27, 7:00 pm
Snohomish Co PUD Building
2320 California St.
Everett, WA

Thurs. June 28, 7:00 pm
at the Museum of Flight
SW corner of Boeing Field
Seattle, WA
